Search for the below words in the puzzle. Up, down, diagonal and backwards.

CHEETAH	COUGAR		CRANE
DOG 	FROG	FROGHOPPER BUG	
HORSE 	IMPALA	ANTELOPE	
LEOPARD 	MONKEY	RED FOX	
SALMON	TOAD 	WILDEBEEST	

Leap Year only comes once every 4
 years. On the 4th year an extra day is
 added to February. Therefore,
 February 29th is called the Leap day.

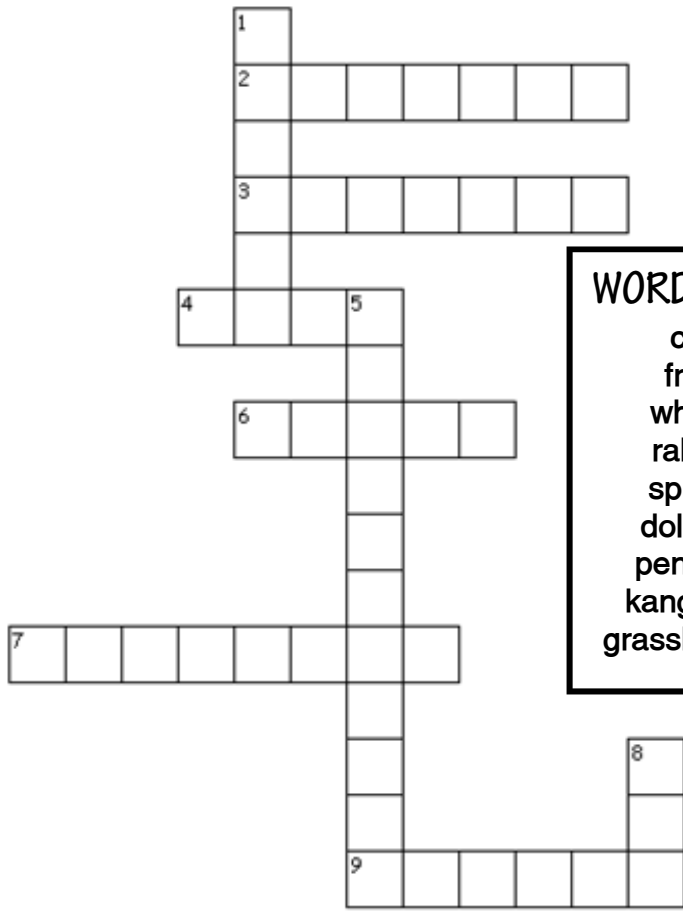

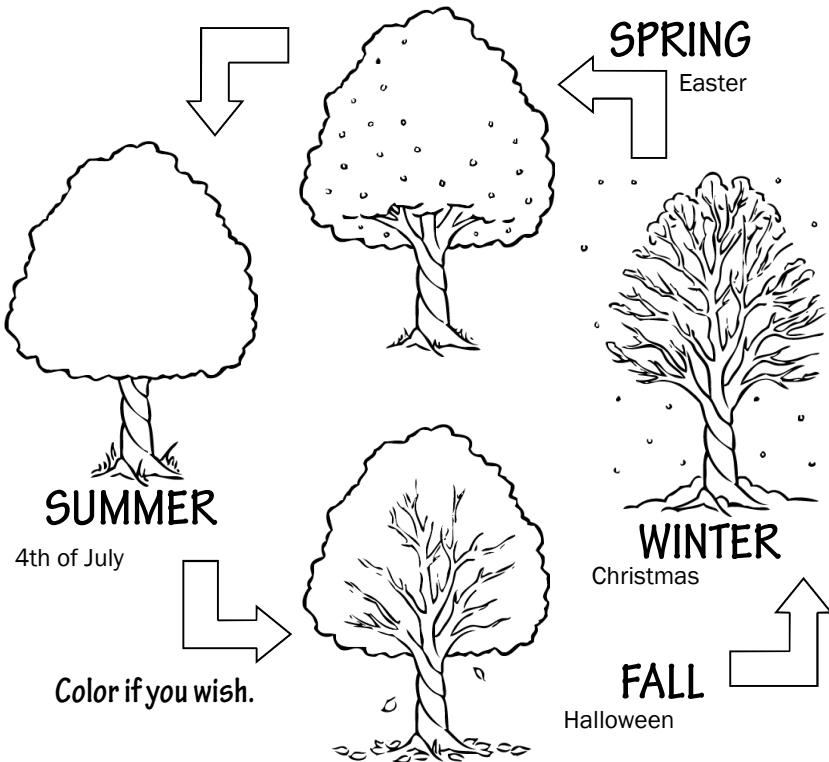

ANIMALS THAT CAN LEAP

Why do we have leap year?

The earth spins and orbits around the sun. This creates our calendar year and the changing seasons. It takes about 365 and 1/4 days to do this. Every 4 years the time has created an extra day of time.

If we didn't add an extra day every four years, our seasons would not be the same. View the below holidays and how they will rotate. Halloween would eventually be in the summer, not fall.

WORD BANK

- cat
- frog
- whale
- rabbit
- spider
- dolphin
- penguin
- kangaroo
- grasshopper

Across

- 2. I leap from icebergs into the water.
