

**What you need:**

Scissors

Stick pin (included in kit)

Pencil with an eraser (included in kit)

Colored pencils and markers to decorate

**Get started:** Cut out the pinwheel square on this page. Decorate both sides of your pinwheel, since you will be folding the paper over to create the pinwheel. Add happy designs and visual expressions of thank you so the workers can see it when they deliver your mail, boxes, food or other items to your door step. You can also add designs to thank the medical teams working hard to keep us safe. After you have decorated the pinwheel, cut on the lines shown on the template, making sure you leave the center area uncut as shown.

**Create the Pinwheel:** Cut out the white circle above and set aside. Gently bend (don't fold) the top left corner with the dotted line and no lettering inward to the center point. Bend all the corners in that don't have the lettering "Thank You" on it. Skip and bend until all four points meet in the center. Place the white circle over the folded flaps. Now stick the pin through all four points AND all the way through the back of the pinwheel. Stick the sharp end of the pin in the eraser, careful to leave a small space between the pinwheel and the eraser so it will spin. Test out your pinwheel. Plant your pinwheel outside so they can see it. You can also plant your pinwheel in a potted plant on your porch or balcony if you live in an apartment or get permission to place them in a common area.
